Scoring

- Total DX Entities x 3
- Total contacts logged both G and DX
- (Entities x 3) + Total Contacts = Score

Example

You have made 1,500 QSOs with 150 different DXCC Entities

- Total DX Entities x 3=> 150 x 3 = 450
- Total contacts logged both G and DX => 1,500 contacts
- (Entities x 3) + Total Contacts = Score => 450 + 1,500 = 1,950
- Total Score is 1,950
